

EVO™ 1-2-3

UNIVERSAL SYSTEM FOR ANCHORING AND HOLDING

Meet Unique Repair Requirements

EVO is a universal anchoring, holding and fixturing system. Each EVO system – 1, 2 and 3 – is made of an optimal number of components to be used alone or combined with one another to securely handle every anchoring, holding and fixturing situation that enters your shop.

These universal kits work for every vehicle year, make and model so you never have to pay traditional fixture costs. There may be a minimum number of components, but together they provide maximum benefit.

Maximize the Benefits of EVO

EVO saves structural repair time with vise-like holding at multiple anchoring locations without additional pull towers and chains.

EVO is compatible with Car-O-Liner BenchRack™, Quick 42™ and Mark 6™ benches and has been approved and recommended by most Original Equipment Manufacturers for a better quality repair.

When used with the Car-O-Tronic Vision2 **X3** electronic measuring system you will quickly and easily be guided through the entire fixturing process:

1. Enter the car's VIN code to access measuring and holding data
2. Measure the vehicle
3. Fixture the vehicle following the displayed holding variations recommended for the alignment.

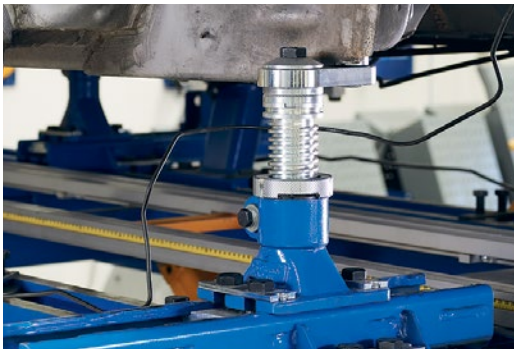

HOLD ON TO MORE BUSINESS! By combining Car-O-Liner benches, measuring equipment and inventory management systems, you'll have the best solution for rapid results and premium quality from diagnosis and repair to final check and documentation.

FEATURES AND BENEFITS

- **APPROVED AND REQUIRED** by many vehicle manufacturers
- **STRONG** — vise-like
- **BOLTING, CLAMPING OR BRACING** — isolate pulling force by holding adjacent areas
- **UNIVERSAL** — fits any car, van, SUV or light truck on the road, no need to rent or buy extra fixtures
- **MODULAR** — limited components that, when combined, meet your repair needs
- **FAST** — quick and easy set-up saves time and money
- **UPGRADEABLE** — start with EVO 1, add EVO 2, EVO 3 or other offered combinations
- **COMPATIBLE** — with the Car-O-Tronic® Vision2 X3 measuring system and WorkShop Solutions inventory management system

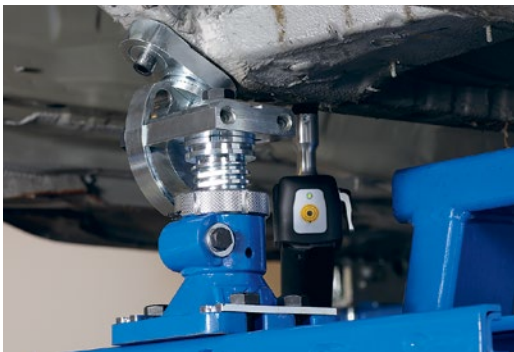

Anchoring and Holding for All Your Repair Needs

EVO 1 Basic Anchoring

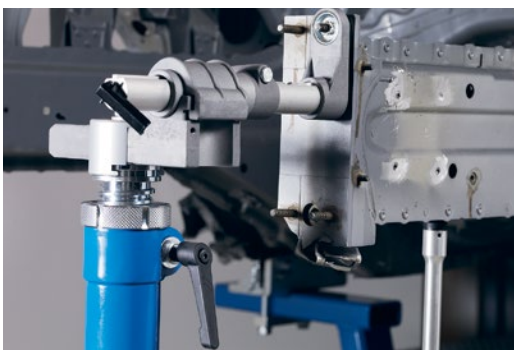

The basic system for anchoring, holding and side support during structural repairs. EVO 1 includes: three towers, multi-purpose clamp, track plate, adapter with bushings, chain holder, downpull and torque bar for heavy operations.

Start with EVO 1 and add on to it as needed.

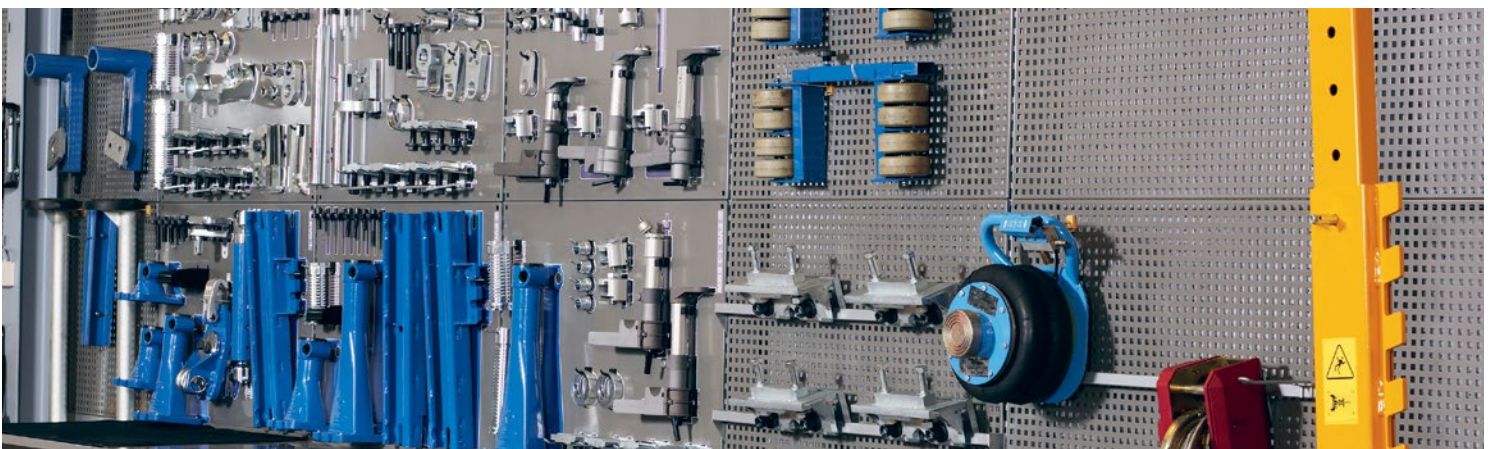

EVO 2 Extended Anchoring

This kit for EVO 1 Basic Anchoring provides additional equipment for anchoring, holding and side support during structural repairs. EVO 2 includes: two extra pull towers and track plates, special tools for rear axle bracket, torque bar extensions and adjustable holders. It is the perfect addition to EVO 1, allowing you to more easily tackle advanced repairs.

EVO 3 Holding and Fixturing

EVO 3 is made for building a fixture to hold new parts in place when welding, bonding or riveting. When combined with EVO 1 and 2, and supported by the Car-O-Tronic Vision2 **X3** electronic measuring system, the equipment works on all vehicle models. EVO 3 includes: adjustable fixture heads, lockable universal joints, lock handle, all-purpose mini-clamp for frame rails, inner fenders and strut towers.

Speed up your workflow! By integrating EVO into the WorkShop Solutions wall you can quickly locate parts.
